4. **Tacama Corn and Soya Project | \$2.796 Billion**

Investments:

5. **2021 to 2023 | \$1.919 Billion**
6. **2024 | \$877 Million**

Impact:

Guyana is working toward self-sufficiency in livestock feed, aiming to reduce its annual feed import bill of approximately USD 50 million (with the wider Caribbean region spending around USD 440.7 million). The country currently consumes about 113,000 metric tons (MT) of feed annually, requiring an estimated 34,000 acres of corn and 28,300 acres of soybeans to meet local demand.

Output (2023):

- Corn: 3,820 acres cultivated, yielding 4,196 MT
- Soybeans: 3,490.6 acres cultivated, yielding 4,036 MT to date
- Projection: Targeting 26,000 acres by end of 2024

Activities (2022–2023):

- Construction of 47 km road at Tacama
- Development of infrastructure including:
 - Three 3,000-ton silos
 - Conditioning plant with weighbridge
 - Drying plant for corn and soy
 - Fence and internal road network at Tacama

2024 Plans:

9. Expansion of the Conditioning and Storage Plant (3 additional silos increasing capacity to 27,000 tons)
10. Installation of conveyor system
11. Construction of a wharf at Tacama for corn and soybean transport

7. Regional Food Hub at Kuru Kuru, Soesdyke, Linden Highway | \$587 Million

A specialized food terminal project began in 2023 with Phase 1 valued at \$187M; Phase 2 in 2024 will add \$400M. The hub will aggregate, process, and distribute source-identified food—mainly from Roraima—supporting cleaning, packaging, and cold storage.

Key Benefits:

74. Boosts employment in post-harvest and agri-logistics, especially in rural areas

- 75. Strengthens Guyana–Brazil trade ties
- 76. Reduces shipping costs for Roraima
- 77. Lowers food prices in Guyana and the region
